### **Tested Storage Product (TSP) Description**

EonStor DS 3024B is a small form factor (SFF) and high density 2U 24-bay storage designed for 2.5” drives and all-SSD arrays. The EonStor DS 3024B is well suited for SMB and enterprise SAN/IP SAN/DAS applications while providing outstanding price-performance. Additional details about the EonStor DS 3024B are available at [http://www.infortrend.com/global/products/models/ESDS\\_3024B](http://www.infortrend.com/global/products/models/ESDS_3024B).

## Summary of Results

SPC-1 Reported Data	
Tested Storage Product (TSP) Name: Infortrend EonStor DS3024B	
Metric	Reported Result
SPC-1 IOPS™	218,007.79
SPC-1 Price-Performance™	\$0.24/SPC-1 IOPS™
Total ASU Capacity	2,000.000 GB
Data Protection Level	Protected 2 ( <i>mirroring</i> )
Total Price	\$52,185.00
Currency Used	U.S. Dollars
Target Country for availability, sales and support	USA

SPC-1 IOPS™ represents the maximum I/O Request Throughput at the 100% load point.

SPC-1 Price-Performance™ is the ratio of **Total Price** to SPC-1 IOPS™.

**Total ASU** (Application Storage Unit) **Capacity** represents the total storage capacity available to be read and written in the course of executing the SPC-1 benchmark.

A **Data Protection Level** of **Protected 2** using **Mirroring** configures two or more identical copies of user data..

***Protected 2:** The single point of failure of any **storage device** in the configuration will not result in permanent loss of access to or integrity of the SPC-1 Data Repository.*

**Total Price** includes the cost of the Priced Storage Configuration plus three years of hardware maintenance and software support as detailed on page 8.

**Currency Used** is formal name for the currency used in calculating the **Total Price** and **SPC-1 Price-Performance™**. That currency may be the local currency of the **Target Country** or the currency of a difference country (*non-local currency*).

The **Target Country** is the country in which the Priced Storage Configuration is available for sale and in which the required hardware maintenance and software support is provided either directly from the Test Sponsor or indirectly via a third-party supplier.

### Storage Capacities, Relationships, and Utilization

The following four charts and table document the various storage capacities, used in this benchmark, and their relationships, as well as the storage utilization values required to be reported.

SPC-1 Storage Capacity Utilization	
Application Utilization	41.67%
Protected Application Utilization	83.33%
Unused Storage Ratio	15.62%

**Application Utilization:** Total ASU Capacity (2,000.000 GB) divided by Physical Storage Capacity (4,800.000 GB).

**Protected Application Utilization:** (Total ASU Capacity (2,000.000 GB) plus total Data Protection Capacity (2,374.945 GB) minus unused Data Protection Capacity (374.945 GB)) divided by Physical Storage Capacity (4,800.000 GB).

**Unused Storage Ratio:** Total Unused Capacity (749.890 GB) divided by Physical Storage Capacity (4,800.000 GB) and may not exceed 45%.

Detailed information for the various storage capacities and utilizations is available on pages 24-25 in the Full Disclosure Report.

## Response Time – Throughput Curve

The Response Time-Throughput Curve illustrates the Average Response Time (milliseconds) and I/O Request Throughput at 100%, 95%, 90%, 80%, 50%, and 10% of the workload level used to generate the SPC-1 IOPS™ metric.

The Average Response Time measured at the any of the above load points cannot exceed 30 milliseconds or the benchmark measurement is invalid.

## Response Time – Throughput Data

9370CSFP16G-0010	16Gb/s Fibre Channel SFP optical transceiver, LC, wave-length 850nm, multi-mode	4	286.00	1,144.00
BH1EMF311-0010	HBA card, LPe16002B, FC-16G, Dual ports, 1 in 1 package	2	1,921.00	3,842.00
	<b>Total</b>			<b>52,185.00</b>

The above pricing includes hardware maintenance and software support for three years, 7 days per week, 24 hours per day. The hardware maintenance and software support provides the following:

- Acknowledgement of new and existing problems within four (4) hours.
- Onsite presence of a qualified maintenance engineer or provision of a customer replaceable part within four (4) hours of the above acknowledgement for any hardware failure that results in an inoperative Priced Storage Configuration that can be remedied by the repair or replacement of a Priced Storage Configuration component.

The above pricing also includes a spare kit with the components that the customer are required to have available in the case of any hardware failure (*"Parts are prepared by customer"*).
