Tested Storage Product Description

Inspur AS5500G2 mid-range hybrid flash storage system is designed for structured or unstructured complex application environment in large and medium-sized enterprises.

With a storage operating system dedicated for cloud computing and big data environments, a full range of flexible software features, an industry-leading hardware platform, and intelligent and visualized unified management software, it meets various storage needs including data storage, data center backup and disaster recovery, and cloud backup in applications such as medium and large-sized database OLTP/OLAP, virtualization, file sharing, cloud computing, and big data.

Inspur AS5500G2 mid-range hybrid flash storage system reaches the highest standard among same-grade products in the industry in terms of performance, function, reliability and availability. It is applicable to sectors such as government, finance, communications, energy, media assets, health care, education, and SMB.
